

Page 1: Benzene

This page introduces Benzene. The figure below is a sample 2D chemical structure used for testing segmentation and OCR pipelines.

Benzene (sample structure)

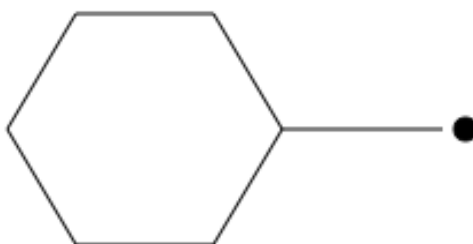

Figure 1. Sample chemical structure for Benzene.

Page 2: Ethanol

This page discusses Ethanol. The embedded structure is intended to test page rendering and image extraction.

Ethanol (sample structure)

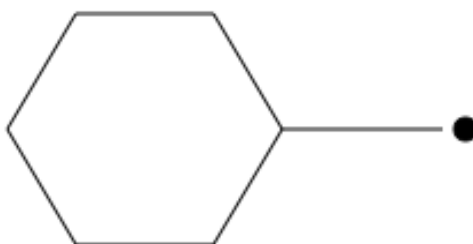

Figure 2. Sample chemical structure for Ethanol.

Page 3: Caffeine

This page contains a sample depiction labelled Caffeine. It mimics the style of a chemistry publication with text and a figure.

Caffeine (sample structure)

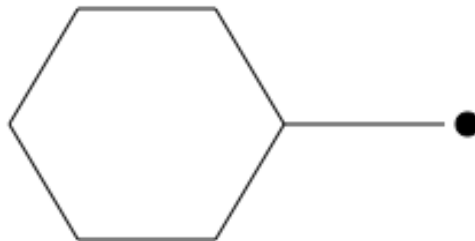

Figure 3. Sample chemical structure for Caffeine.

Page 4: Aspirin

This page presents Aspirin as the final example. This PDF is designed for testing DECIMER-based rendering, segmentation and metadata generation.

Aspirin (sample structure)

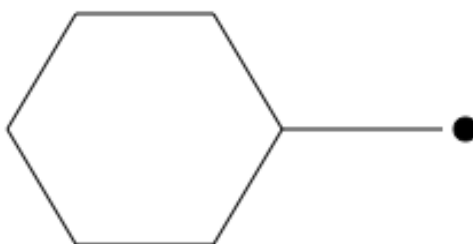

Figure 4. Sample chemical structure for Aspirin.
